

# Elite Ring Toss Game

## Set Up

Place the red base piece on top of the blue base piece joining the circles in the center. This will form a cross shape.

Insert and twist the pins with white ends into the outer holes. They are located next to the numbers 5, 10, 15 and 20

Insert the last red tipped pin in the center hole. This will be the very highest scoring pin and scores 25 points!

## How To Play Ringtoss

Start by placing the game on the floor.

Now decide a starting line which you must stay behind when throwing the rings. The distance will vary based on age or skill level.

Each player starts with 5 rings at the starting line and throws all 5 rings in a turn. Aim to get the rings to land over the pins.

The goal is to get the highest score.

Only the rings that stay over the pins score points (if it hits a pin and bounces off, it does not score)

Each player adds their points together from each round. (each pin has a different score written at the base of the pin) The middle pin with the red tip has the highest score of 25!

After each player has thrown their five rings, the person with the highest score wins!

Or you can decide to take turns until the first player reaches 100 or even 500.

Good luck! We hope the Elite Ring Toss Game brings you lots of fun!
